

Please forward this opportunity to any qualifying teens you know!

The Bioforce applications open December 15th!

NEW YORK
b i o f o r c e

NY Bioforce is designed for high school students who are interested in life sciences research. It combines an intensive lab training program with opportunities for students to connect with paid summer internships in cutting-edge research labs at Columbia University, Weill Cornell Medicine, and Memorial Sloan-Kettering Cancer Center. Our goal is to prepare students for higher education in STEM fields and ultimately to join the workforce as the next generation of scientists conducting essential life sciences research.

Due to COVID, the 2020 program had to be adapted to virtual learning very quickly. The 2021 program will most likely be virtual. (Above picture is from the 2019 program).

Applications for the Spring/Summer of 2021 will open December 15th, 2020 and remain open until March 1st, 2021. It is in the students' best interest to submit the application as early as possible, as we will be reviewing them on a rolling basis.
