

Hands-on science for all? Yes, please!

What a busy, STEAM-filled summer!

Our newest program, HYPOTHEkids Science Clubs has been running since February. With generous support from Verizon we have facilitated both afterschool and summer programming for 1500 students in all 5 boroughs.

Student at Jacob Riis Cornerstone works on her balloon powered car as a part of our Engineer It! season

Students have been exploring math, engineering, science of the city, and biology through 4 of our thematic seasons: Mathcrush, Engineer It!, NYC STEAMed, and My Body Alive.

HYPOTHEkids Science Clubs are offered in partnership with Community-Based Organizations for underserved and underrepresented students. We provide all the materials free of cost to the sites, and offer training so their staff can teach our curriculum on their own. If you'd like to bring our programming to your CBO, please reply to this email.

With generous support from:

New York Bioforce has been named a Here to Here grant recipient!

Bioforce was recently named a grant recipient of the HERE to HERE's Braided Pathways Fund! We join 14 high schools, CUNYs, and their community-based organization partners providing impactful work-based learning programs as part of our commitment to youth equity. We're excited to connect with a community of braided pathways practitioners on proven approaches to youth talent development that are so critical to our City's future.
